Test For Developers - Basic Version

Intro

As a part of the process, you will do a small coding exercise. Please prepare your environment with your prefered dev tools.
- This exercise will take from 30 to 60 min.
- You will be sharing the screen with us, and we will record the session.
- You can use everything you have in your hands to finish the task (google, SO, documentation, copy&paste from other projects, etc.)

Task description

We have two endpoints in a small API that give us a list of books, and a list of authors respectively:

List of books:
```
http://www.mocky.io/v2/5e1683a23000004d00d56089
```

List of authors:
```
http://www.mocky.io/v2/5e1684a93000002c00d5608e
```

You need to create a small app with React and Redux that retrieve the authors and the books, and show them in a web page similar to this:
